CONSULTANTS

Our scalable processes streamline data handling, simplifying management for an organization's success in a data-driven world.

Our Data Management Services Include:

Data Migration

We specialize in efficient data migration planning for successful IT services. Our experienced team ensures a seamless transition and provides unique data migration services. We automate processes using well-known software like ACL, freeing up your time. BHC Group is your reliable partner for taking control of your data and ensuring accuracy, quality, and security. Trust our expertise for a smooth data migration process that minimizes disruption for your business.

Data Integration

Our Data Integration Services simplify handling different data sources, ensuring a seamless experience. We excel at eliminating data silos, providing quick access to real-time information, and streamlining data exchange in old systems. Whether managing data in hybrid or cloud environments or offering integration services within and outside your system, we enhance customer service and operational efficiency. From basic Excel record imports to real-time handling of complex transactions, we adapt solutions using integration software or custom approaches as needed.

Data Quality

At BHC Group, we know how crucial reliable data is for smart decision-making and accurately understanding your business landscape. We recognize that solving data quality challenges requires a joint effort between IT and business, working together consistently to improve the trustworthiness of your data. Quickly understanding the needs of your initiative, we allocate the right resources for effective results. Our commitment ensures that your processes and data are well-managed, accurate, consistent, reliable, secure, and available. This approach promotes compliance, informed management decisions, and the swift execution of your data-driven initiatives, ultimately enhancing decision-making across your organization.

Reporting & Analysis

We partner with you to turn your data into valuable business insights. Our focus is on creating real-time reports and dashboards for marketing, sales, and support performance. We start by organizing your data analysis model and then translating it into clear reports and dashboards for effective performance management. We also craft custom reports using various tools to help you understand not just what your data is but why it is that way. If you encounter complex queries beyond the capabilities of the native Salesforce reporting module, we're here to recommend the best business intelligence tools for your needs.
